# Temboo

Your IoT Software Stack

Auto-generate code to make your devices interact with 100+ APIs, databases, and code utilities using our cloud-based Choreo processes.

Connect devices to the Internet however you choose. Temboo supports WiFi, Ethernet, and Bluetooth Low Energy.

Set conditions to trigger and respond to web-based processes on your device using Temboo's visual programming interface.

Program on the platform of your choice. Temboo supports 10+ SDKs, and comes preloaded and fully integrated into the IDEs and hardware of powerful development platforms.

Hey, hackBCA IV!

We picked out a few projects to help you get started:

Urban Noise Pollution Monitoring:
bit.ly/28X6TAd

Build an IoT Aquaponics System:
bit.ly/29662cB

Build a Smart Trash Can:
bit.ly/29AFi6I

IoT Parking Management:
bit.ly/29rEGgd

Hack with us for free!
